

To whom it may concern, I am expressing my concern about XM radio. I am an over the road truck driver and my job is greatly enhanced by XM radio. Not only the coast to coast uninterrupted programing the instant weather and traffic reports are invaluable to me. I pay for this service and disagree with what the NAB is trying to do. Instead of improving their product to compete with XM they want to rescript XM's content that they deliver to their paying costumers. This pratice I feel is laziness and wrong. It's like one student complaining to the teacher that another students project is better and asking the teacher to tell the inovative student they cannot do their projrect that way. Hopefully a rejection of petition 04-160 will be the outcome of this matter. thank you for your time.
